Report of the management company

Through its public market Impact Equities and Bonds strategy, the fund invests worldwide in stock market listed companies and/or euro-denominated (sub-) sovereign bonds. The companies in which the sub-funds invest have a positive impact on the transition to a sustainable world and address the global challenges posed by structural trends such as ageing population, resource scarcity, inequality and exclusion, as defined in seven transition themes. Each sub-fund has its own risk-return profile, applies a long-term investment strategy and has a concentrated portfolio.

On May 15, 2019, the Triodos SICAV I sub-funds were renamed to more effectively and accurately convey their impact approach.

Also on May 15, 2019, the fund announced the introduction of three distinct equity and bond mixed funds that are managed to defensive, neutral and offensive risk-return profiles. The new mixed funds are variations of the original Triodos Sustainable Mixed Fund, with the original fund being converted into the neutral profile fund. The new sub-funds were launched on 21 June 2019.

The Triodos SICAV I sub-funds each earned the prestigious Nordic Swan Ecolabel. Triodos Euro Bond Impact Fund was the first ever fixed-income fund to be granted the label, and the remaining five sub-funds are the first global, sector diversified, equity and mixed funds to earn the label.

Impact investment approach

The fund distinguishes itself through its impact-driven mandate, strict principles and active dialogue. The investment process starts with forming a long-term vision of the transition towards a more sustainable economy. To develop this, we integrated global trends and challenges, and identified the solutions needed to overcome them. We transposed these into seven sustainable transition themes:

- sustainable food and agriculture;
- sustainable mobility and infrastructure;

- renewable resources;
- circular economy;
- social inclusion and empowerment;
- innovation for sustainability; and
- prosperous and healthy people.

These transition themes are the cornerstone of our investment selection process. Each investment in the portfolio must actively contribute to at least one of these themes through their products, services, or business operating models.

The fund invests for positive change alongside a financial return in line with the broader market at acceptable risk levels, using strict investment criteria and a fully integrated investment and stewardship approach.

For a more extensive overview of the fund's positive impact, an annual impact report published in the first half of 2019, as well as regular updates, can be found via www.triodos-im.com.

Market developments

Macro-economy

The performance of nearly all asset classes was exceptional in the first half of 2019. Against the backdrop of a slowing global economy and sliding business confidence, the first quarter's bullish market sentiment continued into the second quarter. Although markets seemed to start running out of steam in May, dovish statements from the major central banks and resumed trade talks between the US and China refueled investor optimism. This overly positive sentiment was not validated though as data reflects weak underlying fundamentals.

Trade tensions between the US and China continued to cause severe worldwide uncertainty. In May, after the collapse of the agreement made at the end of 2018, the US again raised tariffs on Chinese products, and China retaliated in a similar fashion. However, at the G20 meeting in Osaka at the end of June, both countries agreed to a temporary cease-fire and to resume trade talks.

The expansion of the US economy appears to be slowing down, although it is still stronger than that of other key countries. Recent dovish statements led to the consensus that the US central bank, the Fed, will cut interest rates in the second half of 2019. These developments resulted in declining bond yields and a partly inverted yield curve.

Chances of a hard Brexit have increased significantly with Theresa May stepping down, as her successor Boris Johnson is a well-known hardliner. The budget tensions between the Italian government and the European Commission over Italy's rising debt burden also sparked investor anxiety. Italy ultimately revised its spending plans to avoid EU budget sanctions. On top of that, the recent squabble over certain EU top jobs between the various Member States symbolizes the highly fragmented European political landscape. These developments have slowed down growth in the developed economies. Both the European Central Bank and the Bank of England have expressed their willingness to provide additional stimulus if necessary. While Japan keeps its policy interest rates below zero and with China holding on to their monetary and fiscal stimulus position, we move towards an even looser worldwide monetary policy environment.

Investments

Triodos Euro Bond Impact Fund

Triodos Euro Bond Impact Fund (previously Triodos Sustainable Bond Fund) aims to generate positive impact and stable income from a concentrated portfolio of investment-grade, euro-denominated bonds. The sub-fund's sustainability rigor was recognized in 2018, when the sub-fund was awarded the first Nordic Swan Ecolabel for a debt fund. Moreover, in 2018, the sub-fund was upgraded from two stars to three stars (the highest rating) by the German Forum Nachhaltige Geldanlagen. We are awaiting results for the 2019 FNG label.

Investment policy

During the first half of 2019, the sub-fund reduced its exposure to sovereign bonds and increased its exposure to non-sovereigns and dedicated green and/or social bonds. These dedicated green and/or

or social bonds may be issued by both sovereigns and corporates. By the end of June 2019, the total exposure to these bonds amounted to over 25% of the portfolio. As the last few bonds that did not have a sufficient thematic fit (such as those issued by Sodexo, UPS and Verizon) have now been sold, all corporate bonds and all dedicated green and/or social bonds are now linked to a transition theme. The dedicated green and/or social bonds that were added to the portfolio in the first half of 2019 include bonds issued by SNCF Réseau (Sustainable Mobility and Infrastructure), CAFFIL (Prosperous and Healthy People), ABN AMRO Bank (Sustainable Mobility and Infrastructure), Basque Government (Social Inclusion and Empowerment), Instituto Credito Oficial (Renewable Resources), La Banque Postale (Renewable Resources), France (Sustainable Mobility and Infrastructure), Belgium (Sustainable Mobility and Infrastructure), the Dutch government (Sustainable Mobility and

Infrastructure), Région Wallonne (Social Inclusion and Empowerment) and RATP (Sustainable Mobility and Infrastructure). Moreover, some existing exposures were enlarged or new green and/or social bonds from issuers already represented in the portfolio were included. New corporate issuers in the portfolio are Baxter (Prosperous and Healthy People) and Île-de-France Mobilités (Sustainable Mobility and Infrastructure). The two largest themes in the sub-fund are Social Inclusion and Empowerment and Sustainable Mobility and Infrastructure.

In summary, the weight of sovereign bonds was reduced relative to the start of the year, while the weight of dedicated green and social bonds was increased to contribute to more impact. Compared to the start of the year, the duration of the sub-fund declined slightly (from 6.7 to 6.5).

Performance

In the first half of 2019, the total net assets of Triodos Euro Bond Impact Fund grew from EUR 271.8 million to EUR 299.7 million. During this period, the sub-fund (Z-Dis) realised a return of 4.5% (including reinvestment of dividends), while the benchmark returned 5.2%.

The sub-fund's duration and curve positioning had a positive impact on the relative performance, due to the sub-fund's small overweight in longer maturities. The selection of corporate bonds and sub-sovereigns had a negative effect, due to the sub-fund's underweight position in BBB-rated issuers, while the sub-fund's underweight position in Spanish and Italian sovereigns had a negative selection effect on the relative performance of its holdings in sovereign bonds.

Triodos Global Equities Impact Fund

Triodos Global Equities Impact Fund (previously Triodos Sustainable Equity Fund) aims to generate positive impact and competitive returns from a concentrated portfolio of equities issued by large-cap companies offering sustainable solutions. The sub-fund's sustainability rigor was recognized in 2018, when the sub-fund was awarded the Nordic Swan Ecolabel. Moreover, in 2018, the sub-fund was awarded three stars (the highest rating) by the German Forum Nachhaltige Geldanlagen. We are awaiting results for the 2019 FNG label.

Investment policy

During the first half of 2019, Triodos Global Equities Impact Fund continued to diversify across and within economic regions and transition themes. To achieve this, the sub-fund reduced its dependence on the relatively expensive US stock market, while increasing its exposure in Japan, which is relatively cheaper and where corporate governance initiatives and corporate SDG focus are gaining traction. With economic momentum slowing and operating margins nearing peak levels (in the US), the sub-fund continues to focus on robust individual business models combined with valuation upside when looking for new names to add to the portfolio. This results in the selection of companies with a decent free cash flow, solid balance sheets and strong management teams.

During the first half of 2019, the sub-fund sold its stakes in Becton Dickinson, Canadian National Railway, DS Smith, Rockwell Automation, Verizon Communications and Waste Management. The majority of these disposals was related to minimum standards related issues.

The sub-fund initiated new positions in several new companies, thereby increasing the number of positions to nearly 60. In Japan, FANCL (preservative-free skin care & cosmetics and innovative food supplements), Murata Manufacturing (multi-layer ceramic capacitors and inductors), Nidec (electric spinning motors), Toho (film & theater production and distribution) and Toyota Motor (global leader in electrified and hydrogen fuel cell-powered vehicles) were added to the portfolio. The sub-fund also added several new European names to the portfolio: (plant-based) dairy, water and specialized nutrition company Danone from France, Danish hearing-aid company Demant, Irish food ingredients supplier Kerry and finally Irish corrugated box manufacturer, Smurfit Kappa.

Performance

In the first half of 2019, the total net assets of Triodos Global Equities Impact Fund grew from EUR 652.3 million to EUR 781.9 million. During this period, the sub-fund (Z-Dis) achieved a return of 15.1%, while the benchmark returned 17.9%.

The performance relative to the benchmark was mainly driven by a negative allocation effect

resulting from a relatively high cash position during the first half of 2019. The sector allocation impact was positive, on balance. The stock selection effect within sectors was negative, especially in the Information Technology, Materials and Consumer Discretionary sectors, while the stock selection within the Health Care, Consumer Staples and Real Estate sectors contributed positively.

Triodos Impact Mixed Fund – Neutral

Triodos Impact Mixed Fund – Neutral (previously Triodos Sustainable Mixed Fund) aims to generate positive impact and competitive returns from a concentrated portfolio of global equity positions and euro-denominated investment-grade corporate, sovereign and sub-sovereign bonds. The sub-fund’s sustainability rigor was recognized in 2018, when the sub-fund was awarded the Nordic Swan Ecolabel. Moreover, in 2018, the sub-fund was awarded three stars (the highest rating) by the German Forum Nachhaltige Geldanlagen. We are awaiting results for the 2019 FNG label.

Investment policy

Due to a change in fund strategy involving a shift from 60% bonds and 40% equities to 50% bonds and 50% equities, Triodos Impact Mixed Fund – Neutral increased its overall exposure to equities and decreased its overall exposure to bonds. The sub-fund nevertheless maintained an underweight position in equities and an overweight position in cash during the first six months of the year. Whether it is on the basis of valuations, the business cycle or sentiment, the conditions for the global equity market did not look particularly inspiring.

During the first half of 2019, the sub-fund reduced its dependence on the relatively expensive US stock market while increasing its exposure in Japan, which is relatively cheaper and where corporate governance initiatives and corporate SDG focus are gaining traction. The sub-fund has also reduced its exposure to sovereign bonds and further increased its exposure to non-sovereign and green and/or social bonds issued by both sovereigns and corporates.

Triodos Pioneer Impact Fund

Triodos Pioneer Impact Fund (previously Triodos Sustainable Pioneer Fund) aims to generate positive impact and competitive financial returns from a concentrated portfolio of small- and mid-cap companies pioneering the transition to a sustainable society. The sub-fund's sustainability rigor was recognized in 2018, when the sub-fund was awarded the Nordic Swan Ecolabel. Moreover, in 2018, the sub-fund was awarded three stars (the highest rating) by the German Forum Nachhaltige Geldanlagen. We are awaiting results for the 2019 FNG label.

Investment policy

During the first half of 2019, Triodos Pioneer Impact Fund continued to diversify across and within economic regions and transition themes. To achieve this, the sub-fund reduced its dependence on the relatively expensive US stock market, while increasing its exposure in Japan, which is relatively cheaper and where corporate governance initiatives and corporate SDG focus are gaining traction. With economic momentum slowing and operating margins nearing peak levels, the sub-fund is also looking to add some more defensive names to the

portfolio: companies with a decent free cash flow, solid balance sheets and strong management teams, thereby reducing some of the exposure to highly leveraged growth business models.

During the first half of 2019, the sub-fund sold its stakes in US companies Tenneco (exhaust and suspension supplier) and Waste Management (following the acquisition of a hydrocarbon-related waste business), while initiating positions in four new companies. In February, the sub-fund established a position in Swedish-listed telecom operator Millicom, a strong emerging markets mobile player now rolling out fiber-to-the-home in Latin American markets. In March, within the same Social Inclusion & Empowerment theme, the sub-fund established a holding in Japanese owner/developer of student dormitories Kyoritsu Maintenance. Also in Japan, semiconductor manufacturer Rohm, whose move into SiC devices for electrification in the automotive sector fits well with the Innovation for Sustainability theme, was added in April. Lastly, in May, the sub-fund bought a stake in TPI Composites, the leading outsourced wind turbine blade manufacturer serving equipment manufacturers such as Vestas and Siemens Gamesa Renewable Energy (Renewable Resources theme).

Performance

In the first half of 2019, the total net assets of Triodos Pioneer Impact Fund grew from EUR 246.0 million to EUR 309.7 million. During this period, the sub-fund (Z-Cap) achieved a return of 23.5%, while the benchmark returned 18.1%.

The performance relative to the benchmark was mainly driven by a positive stock selection effect within sectors. The sector allocation contributed

positively too, as positive allocation contributions from the sub-fund's overweight position in the Information Technology sector and underweight position in Energy outweighed the negative allocation effect of the sub-fund's cash position. Stock selection was most positive in the Real Estate, Industrials, Information Technology and Materials sectors and most negative in the Consumer Discretionary and Communication Services sectors.

Outlook

Our expectations for global economic developments remain bearish, with several threats to continued growth hovering on the horizon. Trade tensions between the US and China caused severe worldwide uncertainty, and the current cease-fire agreement is by no means a guarantee for a future deal. The increased likelihood of a no-deal Brexit also presents a major geopolitical risk. Indicators pointing towards a global economic slowdown and the approaching end of the business cycle provoked dovish statements from the major central banks. Investors have priced in substantial future easing measures, but there is a chance that the implemented easing policies will not meet expectations. Global earnings revisions are also expected to remain in negative territory for most global equity markets, based on still elevated earnings expectations and the continuing economic slowdown. At some point, these facts will have to translate into market corrections. Therefore, we remain tactically cautious.

Note 2 - Summary of significant accounting policies

The financial statements are prepared in accordance with Luxembourg regulations relating to investment funds using the following significant accounting policies.

a) Valuation of investments

The value of such assets is determined as follows:

The value of any cash on hand or on deposit, bills and demand notes and accounts receivable, prepaid expenses, cash dividends and interests declared or accrued as aforesaid and not yet received is deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof is arrived at after making such discount as may be considered appropriate in such case to reflect the true value thereof.

The value of transferable securities, money market instruments and any other financial assets listed or dealt in on a regulated market, a stock exchange in another state or on any other regulated market is based on the last available price on the relevant market which is normally the principal market for such assets.

In the event that any assets are not listed or dealt in on any regulated market, any stock exchange in another state or on any other regulated market, or if, with respect to assets listed or dealt in on any such markets, the price as determined above is not representative of the fair market value of the relevant assets, the value of such assets will be based on reasonably foreseeable sales prices determined prudently and in good faith by the Board of Directors.

b) Net realised profit / (loss) on sales of investments

The net realised profit / (loss) on sales of investments is calculated on the basis of average cost of investments sold.

c) Foreign exchange translation

Triodos SICAV I maintains its accounting records in euros and its financial statements are expressed in this currency.

Assets and liabilities which are not denominated in euros are translated into euros at the rate of exchange prevailing in Luxembourg at applicable exchange rates at the end of the year.

Income and expenses in currencies other than euros are translated into euros at the applicable exchange rates prevailing on the transaction date. Resulting realised and unrealised foreign exchange gains or losses are included in the statement of operations and changes in net assets. The exchange rates used as at June 30, 2019:

1 EUR = 1.110330 CHF	1 EUR = 122.694363 JPY
1 EUR = 7.463675 DKK	1 EUR = 9.709433 NOK
1 EUR = 1.000000 EUR	1 EUR = 10.565968 SEK
1 EUR = 0.894791 GBP	1 EUR = 1.138800 USD

d) Income from investments

Interest on fixed income securities is accrued prorata temporis on each net asset calculation date and dividends are accrued on an ex-dividend basis.

e) Allocation of expenses

Each sub-fund shall pay for the general costs and expenses directly attributable to it. These fees are all part of the service fee.

General costs and expenses that cannot be attributed to a given sub-fund shall be allocated to the sub-funds in proportion to their respective net assets. These fees are all part of the service fee.

Since the introduction of MIFID II on January 3, 2018, research costs have to be paid either by the fund, or by the investment manager. The choice was made to have the investment manager pay for the research costs. No research costs are allocated to the sub-funds.

Note 3 - Determination of the net asset value of shares

The net asset value per share of each sub-fund is expressed in the reference currency of the relevant sub-fund and is calculated for each sub-fund by dividing the assets of such sub-fund less its liabilities by the number of shares in issue in respect of such sub-fund.

The annual general meeting shall decide, on recommendation of the Board of Directors, what share of Triodos SICAV I 's profits shall be distributed from each relevant class of shares. Consequently, the annual general meeting may approve, for each sub-fund or class of shares, the distribution of the net income and capital gains, realised or unrealised, after deduction of capital losses, realised or unrealised. The amounts corresponding to income attributable to the shares of a class for which it was decided not to pay a dividend will be capitalised in the assets of the class concerned.

Note 6 - Subscription tax

Triodos SICAV I is currently not liable to any Luxembourg tax on profits or income, nor are distributions paid by Triodos SICAV I liable to any Luxembourg withholding tax. Triodos SICAV I is, however, liable to an annual subscription tax in Luxembourg, which in principle amounts to 0.05% per annum of its net asset value, such tax being payable quarterly on the basis of the value of the aggregate net assets of the sub-funds at the end of the relevant calendar quarter. However, such rate may be reduced to 0.01% per annum of the net asset value for specific classes of shares or sub-funds which are restricted to institutional investors (Class-I, Class I-II and Class-P shares). Furthermore, if some sub-funds invest in other Luxembourg UCIs which in turn are subject to the annual subscription tax, no annual subscription tax is payable by Triodos SICAV I on the portion of assets invested therein.
